64TH ARMY, SHENYANG MILITARY REGION, CHINA (

ABSTRACT

1.	This report discusses the status	of the 64th Army in the Shenyang M	ilitary Region,
China, as of	It describes physical and	functional changes to the facilities in add	dition to order-
of-battle changes	and fluctuations for the period		The functions
and locations of	these units were derived primari	ly from KEYHOLE imagery.	

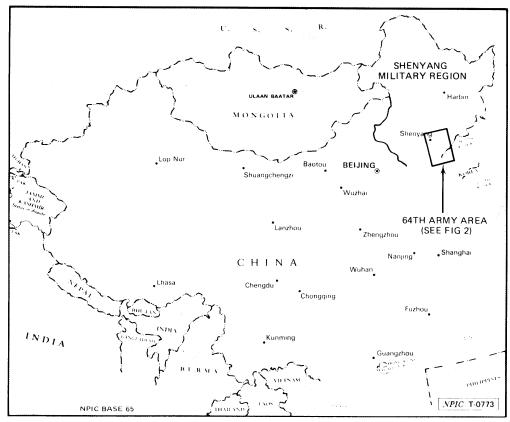

2. (S/D) Infrequent coverage and low equipment counts during the reporting period precluded an accurate estimate of activity levels in this army. However, minor construction and some equipment upgrading was observed. Training facilities in the various installations appeared to be consistently active.

3. (U) This report contains three location maps, eight annotated photographs, one chart, and one table.

INTRODUCTION

4. The 64th Army¹⁻³ (Figure 1) is one of six main force armies in the Shenyang Military Region (MR), China, and has the same general organizational structure⁴ as ground forces throughout China—the rule of three. Each army usually has three divisions (usually numbered consecutively), each division usually has three regiments, and each regiment usually has three battalions. Other units subordinate to the army such as artillery, armor, antiaircraft artillery (AAA), and engineer units are not included in the rule of three although most have three operational battalions per regiment. Also, independent combat support divisions usually have three regiments.

5. The 64th Army was originally the 4th Column, 2nd Army Group, North China People's Liberation Army. After the Chinese designated this unit the 64th Army in late 1948, it continued to participate in the fighting in the Beijing area. In February 1951, the 64th Army moved to the Liaoning Province of Shenyang and entered North Korea later that same month. After several campaigns, it returned to northeast China in July or August 1953. There have been several moves within Liaoning Province since that time, but the 64th Army has remained in the province since its return from Korea. Information from 1978 indicates that the commander of the army was Zhang Huairui, also the commander of the Luda Garrison Command.

Top Secret RUFF	25X ⁻
18. The 395th Tank Regiment was reportedly at Pien-niu-pao-tzu Army Barracks AL-2. During the reporting period, armor counts at this facility have consistently been low—ten or fewer armored vehicles. There has been no perceptible change to the installation.	25X
19. (S/D) A headquarters unit and a tank battalion were reported ⁵ at Qiaotou Army Barracks Westnorthwest AL-3. However, because of the type of buildings observed, the headquarters appeared to be of regimental echelon. The installation is also armor associated, but the armored vehicle count at this facility has historically been less than ten. This installation may possibly house a headquarters for all armor units supporting this division. While individual tank units are operationally located with infantry regiments, they may be subordinate to a single divisional tank regiment headquarters at Qiaotou Army Barracks West-northwest AL-3.	
191st Infantry Division	
20. The 191st Infantry Division in the Dandong area consists of a headquarters, three infantry regiments, an artillery regiment, and an AAA battalion. During the reporting period, no changes have been observed at the headquarters, the three infantry regiments, or the division AAA unit. The only apparent change within the 191st Division was seen in the 471st Artillery Regiment housed at Dandong/Shih-ying-chieh AL-2.	25X ⁻
As of the unit appeared to have been upgraded from a regiment with a one gun battalion, one howitzer battalion, one mortar battalion, and one rocket launcher battalion to a regiment with one field gun battalion, two howitzer battalions, and the rocket launcher battalion.	25X
192d Infantry Division	
21. The 192d Infantry Division (Figure 6) consists of a division headquarters, three infantry regiments, and an AAA battalion. Although the interim NBRG ⁵ reports the location of the 192d Division in	25X ²
Shanghekou/Kuantien area, have confirmed the presence of the division in the Fengcheng area. The division headquarters and its subordinate AAA battalions are at Fengcheng Barracks Northwest and Infantry Division Headquarters AL-2 (Figure 7) where facilities similar to other PLA division headquarters areas (a headquarters-type building, an auditorium, and rear service support facilities) are present. The 575th, and 576th Infantry Regiments are at Hsueh-li-chan Army Barracks AL-1 (Figure 8), Kao-limen Army Barracks Northeast AL-1 (Figure 9), and Fengcheng Army Barracks Southwest AL-1 (Figure 10), respectively. Each of these installations has a regimental headquarters area and three infantry battalions. Infantry training facilities were also observed at each of these installations. The 472d Artillery Regiment is housed at Fengcheng Army Barracks West AL-3 (Figure 11). Although equipment observations have been very low, artillery equipment has been identified at this installation, and sufficient equipment storage facilities exist to house a full regiment. Neither an engineer nor an armor unit have been identified with this division.	25X ⁻
nouse a full regiment. Evenine an engineer not an armor care nave seen recinine a seen as a seen	25X ²
A division headquarters, an infantry regiment, and an AAA unit were identified ⁵ at Shanghe-kou Army Barracks North-northwest AL-1. Analysis of the headquarters facilities indicates that they were not as extensive as normal main force quarters facilities. Recent activity which began between	25X ²
at Shanghekou AL-1 indicated that a larger division headquarters facility was under construction; however, these new facilities are probably for the local force units identified by sigint. Further, there is no evidence to associate the Shanghekou installation with infantry. No infantry training or training facilities have	25X′
been identified in or adjacent to Shanghekou AL-1. The AAA unit at Shanghekou AL-1 may actually be a regiment rather than a battalion based upon recent equipment observations.	25X1 25X1
24. (S/D) An infantry regiment was reported ⁵ at Yung-tien-cheng Army Barracks AL-1 and is actually present. However, since there is no indication of a main force division, this unit is probably associated with a garrison division. This facility may also house a unit of mortars or 107mm multiple-rocket launchers. No changes have been observed at this installation.	25X
25. (S/D) The facility identified as Kuantien Army Barracks North AL-I and as housing an infantry regiment is probably not military related. There is no evidence of infantry training in or adjacent to the installation.	25X ⁻
26. (S/D) An artillery regiment has been reported at Kuantien Army Barracks and Storage South (BE The only recorded order of battle was one possible field artillery piece observed on There is no other indication that this facility ever housed an artillery unit. This location has no confirmed vehicle/equipment storage nor are there any artillery training areas within or adjacent to this facility. The type and appearance of the buildings suggest a civilian or support function. Current construction indicates that this may be a maintenance facility.	225X
27. (S/D) The engineer battalion reported in the interim NBRG ⁵ at Shanghekou Barracks Area is probably main force since there has been no evidence that garrison units have associated bridging equipment. This engineer unit may be associated with the independent engineer regiment at Dandong. No change has been noted at this facility.

28. (S/D) A tank unit of unknown subordination is reportedly ⁵ at Kuantien Army Barracks Southeast AL-2 The armor unit here consists of a battalion of tanks and a battalion of armored personnel carriers. The total number of armored vehicles observed here has never exceeded the number of	25X1
armored vehicles usually seen in a tank/assault gun regiment. However, tracked vehicle storage sheds are under construction. Additional evidence will be required before a full tank regiment can be confirmed at this installation although the appearance of the facilities and the types of buildings suggest a unit of regimental echelon.
